Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lundstedt, 5926928.

Regarding claim 1, Lundstedt discloses a male portion (20), a female portion (30), and part of one face of the female portion is formed from a screen (holes 34, 36, 38) made of the same material as the rest of the female portion and integrally molded with the female portion.

Regarding claims 2 and 3, Lundstedt discloses ribs (33, figure 2c) disposed along an underside of the female face extending across the screen to support part of the buckle containing the screen.

Regarding claim 5, Lundstedt discloses a strap attachment bar (32).

Regarding claim 6, Lundstedt discloses a plurality of cross bars (62) defining a set of substantially uniformly spaced holes between the bars.

Regarding claim 7, Lundstedt discloses a side-release type buckle with the male portion having two release tabs (52) that snap into two locking slots (43) on the female portion to lock the male portion to the female portion.

Regarding claim 8, Lundstedt discloses a screen on the top and bottom faces (figure 2c).

Allowable Subject Matter

3. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
